To Whom It May Concern

I am delighted to recommend P Joshi, a final-year undergraduate student in the Electrical Engineering department at the National Institute of Technology Andhra Pradesh. I taught Joshi in the Machine Learning coursework (EE363) and mentoring him on his project, "Deep Learning-Driven Object Detection for Health Monitoring of Power Line Assets."

Joshi has consistently demonstrated exceptional academic performance, earning an excellent grade in Machine Learning (EE363). He has a strong command of concepts like neural networks, deep learning algorithms, and optimization techniques, and excels in applying these to practical challenges.

In his project, Joshi designed and implemented advanced object detection algorithms, addressing challenges in the deep learning and machine learning domains. His dedication, problem-solving skills, and meticulous approach earned him an excellent grade and high praise.

Joshi's passion for learning, combined with his technical expertise and collaborative mindset, makes him an excellent fit for Machine Learning and Artificial Intelligence-related roles. I am confident that he will be a valuable addition to your team.

Sincerely,

Dr. Sri Phani Krishna Karri (Asst. Prof.,)
